

HUMMINGBIRD COFFEE

UNIC STELLA

2-GROUP ESPRESSO MACHINE

A professional multi-boiler machine that offers vastly superior features. Separate boilers for each group head which are thermostatically controlled reducing the possibility of burning your coffee. They also offer a separate boiler for hot water and steam and are extremely quiet.

- Independent steam boiler – 8.9 litres
- Large individual coffee boilers for each group – 1.65 litres each
- Easy lock portafilters
- Dosamat auto portafilter reader
- Intelligent power supply management
- User friendly interactive LCD touch screen
- Independent group LED with up to 5-button touch screen
- Horizontal control manual steam arm

• DIMENSIONS:

W: 787mm

D: 610mm

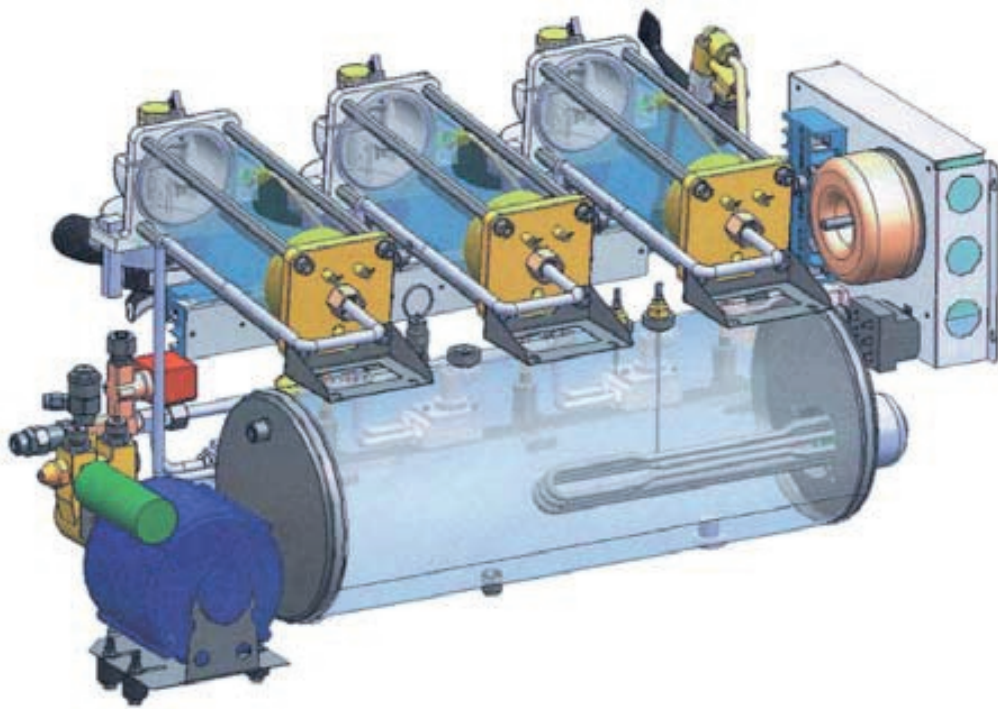

H: 584mm

HUMMINGBIRD COFFEE

UNIC STELLA

TRANSFORM YOUR
ESPRESSO WITH
THERMALINK NETWORK®
TECHNOLOGY.

Stella is an evolved multi-boiler espresso machine that is pioneering intelligent networked management of the distribution of energy for consistent brewing temperature and precise PID temperature control of each boiler.

Multi independent 1.65 L coffee boilers. 2000W per group, fully working and controlled independently from each other.

Large 8.9 L independent steam boiler.
6550W PID thermally regulated with pressure sensor.

Use of maximum simultaneous power, 6700 W limiting power consumption while ensuring optimal performance of each function.

Pre-infusion: mechanical with 3 lung sizes (0, 3, 6, seconds)/
electronic progressive pre-infusion up to 10 seconds
(option per group).
